

Place Park in Some City Project Narrative

Background

Some City officially opened Place Park in August 2000. This project was the culmination of years of planning and has quickly become a true city jewel. Facilities include a splash pad, pavilion, playground, pickle ball and basketball courts, open green space, walking trails and a restroom facility. Some City is a growing community, and sees thousands of people in the park each year, as it is the location for the City's many events throughout the year.

Need

Phase one of Place Park includes a large playground structure, parking lot expansion, and picnic shelters that will accommodate more visitors. While the existing facilities are accessible to anyone, many parents of younger and smaller children would prefer that their children have alternative options for recreation during high traffic days and times.

Request

Some City is requesting \$500,000 in grant funds to construct a large playground structure, parking lot expansion, and picnic shelters at Place Park.
